Subject O'Hare

I think it is ridiculous to even think of expanding O'Hare airport! The airlines are in serious financial straits. The air traffic controllers are already overtaxed. The expansion would disrupt existing businesses and displace families. There is a perfectly good airport in Gary that could benefit from increased use and that would better serve the people of Indiana and southeastern Chicago, maybe even downtown once the highway construction is completed.

There is the idea of a few politicians who can't see past the end of their pocketbooks and should not be approved. Diane McGovern
